Rise of Form: Concordance of Papers, Module, and Chapters

Concordance v0.2, Project secret3, August 11, 2026

Purpose: one table joining the two rows. For every chapter and section of the book, the formal claims it leans on, the module anchors by name, and the working paper that carries the verification. This document is the seed of the book's appendix, The Receipts. Status marks: [d] delivered, [h] delivered and held, [p] planned.

1. The papers, current inventory

1. Tree Numbers (working paper, at v0.5, appendix synchronized): tree numerals, grafting, leavesGraft, Theorem A in both directions.
2. Transparent Arithmetic (working paper, at v0.9, appendix synchronized): the rewriting arithmetic R1 to R4, Theorem B via the value ledger (boxReduces, the invariant family, afUnique), the cost formula boxLen, sumSteps with rLenSum.
3. The Linearity Ladder (working paper, at v0.1): the occurrence counter occ, R2 as the arithmetic's only erasing clause, R1 its only duplicating clause, kinship of R2 and the K move.
4. Combinator Soup, v0.3: the conserving reactor, tauAbsorbs, upsAbsorbs, normal-form facts, condMass, kBalanced, sBalanced, the null-model census, the recycling core, food closure.
5. Freezing and Flux, v0.1: the phase campaign, flux non-monotone with its maximum at the balanced melting fraction, diversity peaking with it, the two starvation regimes, glass and gas.
6. No Bird Sings Peirce, v0.1: the three-graded matrix, matSound, peirceNoProof, dneNoProof; the open half tTyped with tSteps.
7. A Verified Coin: Type Preservation, v0.1: derivAppInv, kInvTy, sInvTy, arrInj, derivPreserved, derivSteps; the quantity lesson.
8. The Entropy Budget of Multiplication, v0.1: stepDup, stepErase, dupMass, eraseMass, boxDup, boxErase, sumDup, sumErase, tSizeNum; the disagreement of prices and the Landauer reading.
9. A Quoted Alphabet, v0.1 (C5 stage one): Code, embed, quote, qSCase, qKCase, qAppCase, quoteClosed, quoteInj.
10. The Reader's Engine, v0.1 (C5 stage two): simStep, simSound, simNormal, simRun, simRunSteps; the view-lemma lesson.
11. Every Typed Song Ends, v0.1: strongNorm, strong normalization for the coin by reducibility with semantic neutrality; L1 closed.
12. The First Eye, v0.1 (movement one): the bench (sub1NoOcc, absSubSteps, abs2Beta), the tags, qMk, and readK with seven theorems.
13. The Second Eye and the Assembler, v0.1 (movement two): the bench through arity four, readS with nine theorems, the contractum assembled by qMk.
14. The Dispatcher, v0.1 (movement three): rootRead with nine theorems, exact agreement with the engine's root fragment.
15. The Knot, v0.1 (movement four): simT, the verified self-reader, simCorrectJ and simCorrectN over all codes; C5 complete.
16. Two Refusals, One Ledger, v0.1: occStepEq, occRunEq, noClone, noDelete, cloneBill, deleteBill; line Q opened.
17. The program note, v0.6, and the research agenda, v0.9: governance, not verification.

The module: Proofs.idr, 3,337 lines, %default total, no postulates, no holes; the one command: idris2 —check Proofs.idr.

2. The concordance

Book location	Claim carried	Module anchors	Paper
1 Two Moves, The Law of Three [d]	the two rules and application as the triad of the machinery	the Step relation, RedK, RedS	module only, by design
1 Two Moves, The Price of Forgetting [d]	K is the only mover that discards, and forgetting pays	occ ledger; kinship clauses	The Linearity Ladder; now sharpened by The Entropy Budget
1 Two Moves, The Answer [d]	composition and the crown	bC, sb, skIdentity	Tree Numbers; Transparent Arithmetic
1 Two Moves, The Law of Seven [d]	the sterile circle, the mirror, the ladder and the knot	omegaCycle, mirror, yKnot, yUnfolds	module; program note
2 Everything from Two, The Workshop [d]	true, false, the box and its openings; the eight-move run	kTrue, skFalse, pairBeta, pairFst, pairSnd, skIdentity	module part M; costs in Transparent Arithmetic (rLenSum, boxLen)
2 Everything from Two, One Mountain [d]	completeness of the two moves	abs, absCorrect (the recipe as engine)	The Vanishing Engine section of module part N, with chapter two
2 Everything from Two, The Empty Symbol [d]	the moves never look at the names; the checker understands nothing	substSteps, absCorrect	module; the closure claim rests on the mountain
2 Everything from Two, The One-Second Test and The Inside [d]	the border and the gate	none, and saying so is the point	none, by design
3 The Unreachables, The Trees [d]	numbers as trees, grafting multiplies leaves, Theorem A both ways, Theorem B by the ledger, the cost formula	leavesGraft, boxReduces, the invariant family, afUnique, boxLen, tSizeNum	Tree Numbers; Transparent Arithmetic; The Entropy Budget for tSizeNum
3 The Unreachables, Alphabet and Open Country [d]	Euclid, unique factorization, the distribution	classical, cited	none needed
4 The Price List [p]	costs exactly: steps, roads, heat	boxLen, omegaCycle, boxDup, boxErase, sumDup, sumErase, tSizeNum	Transparent Arithmetic; The Entropy Budget
5 The Vessel [p]	the devourer, the balanced world, glass, gas, the living middle	tauAbsorbs, upsAbsorbs, condMass, kBalanced, sBalanced, normal-form facts	Combinator Soup v0.3; Freezing and Flux v0.1
6 The Machine That Runs Itself [p]	the fixed point, readers, the quoted alphabet and the engine	fondPoint, yKnot, yUnfolds, mirror; quote, quoteClosed, quoteInj;	A Quoted Alphabet; The Reader's Engine; The

		simSound, simNormal, simRunSteps; simT, simCorrectJ, simCorrectN	First Eye through The Knot
7 The Question [p]	the gate and the contract	none, by design	none
8 Coin, The Same Table Twice and Run the Proof [h]	axioms are the moves; proofs run and stay proofs	Deriv, iTyped, bTyped, derivPreserved, derivSteps	A Verified Coin: Type Preservation
8 Coin, The Garden and the Rewinder [h]	the classical border fenced; the open half; constructive infinity	matSound, peirceNoProof, dneNoProof, tTyped, tSteps, yUnfolds, probeCert, strongNorm	No Bird Sings Peirce; Every Typed Song Ends; Transparent Arithmetic for probeCert
8 Coin, The Three Sayings [h]	the reading of I, K, S	skIdentity, iTyped; the K ledger; S as the share	reading over the anchors above; contract register
9 The Machine Room [p]	how proofs are done; the blind witness	the module itself as exhibit	all papers as worked examples
10 Thought Unbound [p]	thought is not language and not machine	substSteps, absCorrect recalled	chapter two's spine; external science carries the rest
11 The Witness [p]	the two refusals; reception at scale	noClone, noDelete, cloneBill, deleteBill as compiled cousins; the quantum theorems cited	Two Refusals, One Ledger; classical physics, cited
12 The Receiver [p]	the receiving level in psychology	none, by design	none
13 and 14, Finale [p]	the road named; the reading stated	recalls only	the whole shelf
Appendix, The Receipts [p]	claim to theorem to paper	this concordance, matured	all

3. Gaps and open items, honestly

Paper housekeeping is done: both first papers were synchronized on August 11, 2026, and their appendices now carry the module map instead of a verbatim copy, so they can no longer go stale. C5 is complete through the knot, and the normalization sequel is delivered; both debts of the first concordance are paid. The soup line's probe ledger (P1 remainder) is optional, wanted only if the Vessel chapters ask for it. Chapter one's Law of Three and Law of Seven rest on module and program note without a dedicated paper, which is judged correct for their content. No book claim currently points at a theorem that does not exist; the direction of debt runs the other way, compiled results (the engine, the budget) waiting for their chapters.
